# PhishCare
### Your First Line of Phishing Defense

A PRODUCT BY

**CyberSapiens**
THE CYBER SECURITY EXPERTS

Phishing attacks are a universal threat that can compromise sensitive data and result in significant financial losses and damage an organization's reputation. Employees often fail to recognize sophisticated phishing scams, leading to data breaches, legal issues, and loss of customer trust.

## Worldwide Phishing Statistics: Year 2021 - 2024

893,000,000 +

709,000,000 +

507,000,000 +

250,000,000 +

2021    2022    2023    2024

PhishCare offers a comprehensive solution to test your employee's maturity levels in recognizing and responding to phishing attacks, while providing continuous awareness and assessment to enhance their ability to identify such threats.
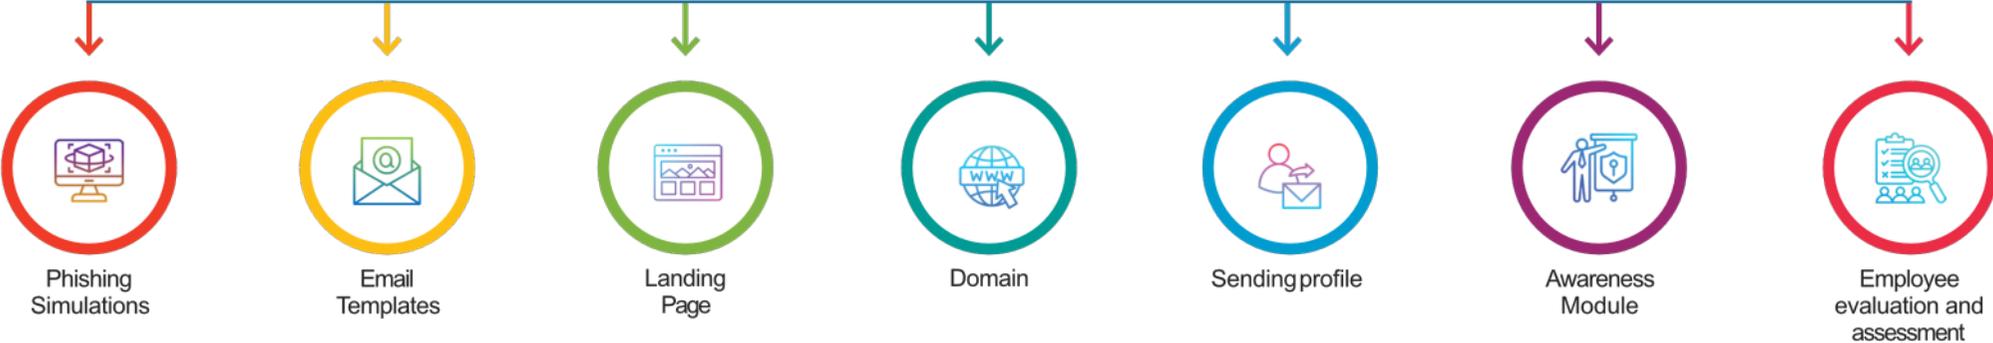

## Introduction

PhishCare is an advanced phishing simulation tool developed by CyberSapiens to enhance your organization's cybersecurity defences. PhishCare provides phishing simulations to test employees' ability to recognize phishing attempts, as well as comprehensive awareness and assessment programs. By mimicking real-world phishing attacks, PhishCare trains employees to respond effectively, significantly reducing the risk of data breaches and financial loss.

At CyberSapiens, we have successfully implemented PhishCare in various organizations, having over 25,000+ employees. Initially, many employees lacked the maturity to recognize phishing attacks. Through our awareness and assessment programs, we helped them understand the impact of phishing threats on the company. This comprehensive training has significantly improved their ability to identify and respond to phishing attacks, strengthening the overall security posture of the organization.

## What You Will Get

↓

## Unlimited

| Phishing Simulations | Email Templates | Landing Page | Domain | Sending profile | Awareness Module | Employee evaluation and assessment |

# Know The Features

**Customizable Email and Landing Page Templates:**
PhishCare allows users to mimic real world phishing scenarios, enhancing simulation realism and improving user engagement.

**Awareness Module:**
The tool includes an awareness module with educational content on cybersecurity and phishing. These modules help users understand and identify potential threats.

**Employee evaluation and assessment:**
Our tool provides comprehensive assessments, including quizzes and tests, to evaluate users understanding and retention of material covered in the awareness modules

**Comprehensive Tracking:**
The tool allows user to monitor various metrics of the phishing simulation campaign, including email delivery, open rates, link clicks, data submissions, participation in awareness modules, and assessment results.

**Graphical Dashboard Access:** User can access a graphical dashboard that visually represents tracking data and key metrics facilitating quick analysis and decision-making on campaign performance.

**Campaign Completion Report with Raw Data:**
After a phishing simulation campaign, user can generate a detailed report with summary and raw data, providing insights into campaign effectiveness and user's behaviours for further analysis and improvement.

**Custom Domain Integration:**
Seamlessly integrate custom domains with our tool, allowing users to send phishing emails and host landing pages using various domains.

## Benefits

**Enhanced Employee Awareness**
Increase employees' ability to recognize phishing attempts, reducing the likelihood of successful attacks.

**Reduced Risk of Data Breaches**
With trained employees, the risk of data breaches due to phishing attacks is significantly lowered.

**Reporting**
Meet regulatory requirements for cybersecurity training and awareness with comprehensive reporting.

**Cost-Effective Training**
Reduce costs associated with data breaches by investing in proactive training.

**Improved Security Culture**
Foster a culture of security within your organization, improving the overall security posture.
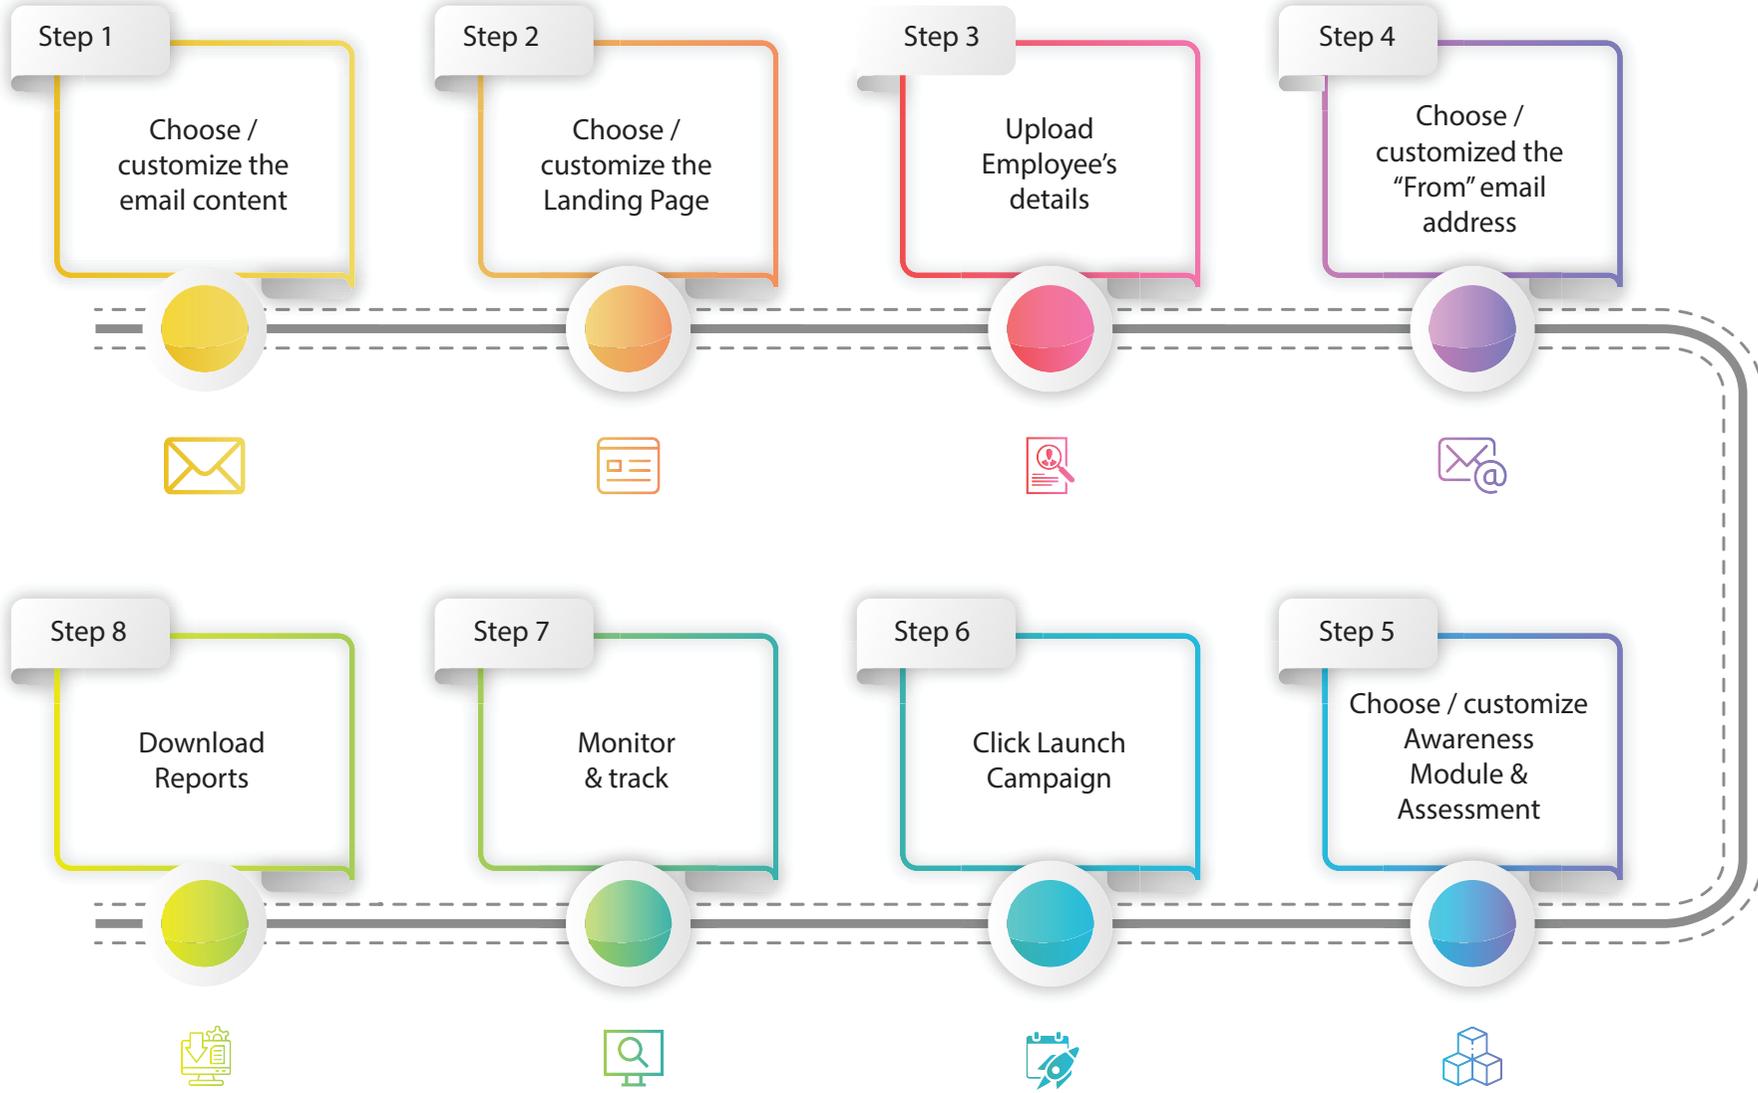

# Why Choose Us

PhishCare offers extensive customization, real-time analytics, and seamless integration with your existing security infrastructure. Our tool provides interactive feedback to employees, enhancing their ability to recognize and respond to phishing attempts. Our cost-effective pricing ensures robust protection for organizations of all sizes, making us the ideal choice for comprehensive phishing defence.
